

ADA Web Accessibility Audit Report

Ranuk IT Solutions — Sample Client Website

2026-06-10

Indice

Executive Summary 3

1. Critical — Color Contrast Failures (WCAG 1.4.3) 3

2. Critical — Missing ARIA Labels (WCAG 4.1.2) 4

3. Critical — Keyboard Navigation (WCAG 2.1.1) 4

4. Serious — Image Alt Text (WCAG 1.1.1) 4

5. Serious — Form Accessibility (WCAG 3.3.2) 5

6. Moderate — Heading Hierarchy (WCAG 1.3.1) 5

7. Remediation Roadmap 5

Executive Summary

This report presents findings of a comprehensive ADA and WCAG 2.1 Level AA accessibility audit on a sample client website. Automated scanning, manual keyboard testing, and screen reader validation (NVDA, VoiceOver) were used.

Overall Compliance Score: 62/100 — FAILING. 14 critical violations, 9 serious issues, and 6 moderate warnings must be remediated for WCAG 2.1 AA compliance.

Top issues: color contrast, missing alt text, absent ARIA labels, and keyboard navigation traps.

Severity	Count	WCAG Criteria	Impact
Critical	14	1.1.1, 1.4.3, 2.1.1, 4.1.2	Blocks access; high litigation risk
Serious	9	1.3.1, 2.4.1, 2.4.7, 3.3.2	Significant usability barriers
Moderate	6	1.4.11, 2.4.6, 3.1.1	Degraded experience
Minor	3	1.3.5, 2.5.3	Best-practice tips

1. Critical — Color Contrast Failures (WCAG 1.4.3)

Multiple text elements fail the minimum 4.5:1 contrast ratio required for normal text under WCAG 2.1 AA.

- Increase body text contrast to 4.5:1 min. Replace #999 with #b0b0b0.
- Ensure CTA ratio meets 4.5:1 on hover/focus states.
- Effort: 2-4 hours CSS.

Element	FG	BG	Ratio	Required	Status
Hero subtitle	#999	#1a1a2e	3.2:1	4.5:1	FAIL
Nav links	#ccc	#16162a	3.8:1	4.5:1	FAIL
Footer text	#666	#1a1a2e	2.1:1	4.5:1	FAIL
Pricing badge	#00d4ff	#1a1a2e	2.9:1	4.5:1	FAIL
CTA buttons	#00d4ff	transparent	3.1:1	4.5:1	FAIL
Card text	#999	#16162a	3.0:1	4.5:1	FAIL

2. Critical — Missing ARIA Labels (WCAG 4.1.2)

Interactive elements lack ARIA labels. Screen readers cannot identify buttons, links, or form controls.

- Audit all interactive elements for aria-label/labelledby.
- Implement focus trap for modals.
- Effort: 4-6 hours.

Element	Location	Issue	Fix
Hamburger menu	Navbar	No aria-label	Add aria-label + aria-expanded
FAQ accordions	FAQ	Missing aria-expanded	Add aria-expanded + aria-controls
Form inputs	Contact	No labels	Use label or aria-labelledby
Social links	Footer	No label	Add descriptive aria-label
Pricing toggle	Pricing	No role/state	role=switch + aria-checked
Modal close	Modal	No name	aria-label Close dialog

3. Critical — Keyboard Navigation (WCAG 2.1.1)

Keyboard failures prevent users relying on assistive tech from accessing content.

- Tab order broken: focus jumps hero CTA to footer (CSS order without DOM order).
- FAQ items not focusable: divs lack tabindex and key handlers.
- Modal does not trap focus; Escape does not close it.
- Skip navigation link missing entirely.
- Add skip-to-content, fix tab order, add keyboard handlers.
- Effort: 6-8 hours with NVDA/VoiceOver testing.

4. Serious — Image Alt Text (WCAG 1.1.1)

Images lack meaningful alt text. Decorative images missing empty alt attributes.

- Provide descriptive alt for informative images. Empty alt for decorative.
- Effort: 1-2 hours.

Image	Current Alt	Issue	Fix
Hero illustration	image.png	Filename as alt	Descriptive text
Client logos	(none)	Missing alt	Empty alt or company name
Team photo	photo1.jpg	Filename as alt	Descriptive caption
Pricing icons	(none)	Missing alt	Plan name
Blog thumbs	img_2026	Unhelpful	Post title

5. Serious — Form Accessibility (WCAG 3.3.2)

Contact form lacks labeling, error identification, and input assistance.

- All 5 inputs use placeholder only. No visible labels.
- Validation via red border only. No text. Fails WCAG 1.4.1.
- No indication of mandatory fields. Missing aria-required.
- Success: brief green flash only. No ARIA live region.
- Add visible labels, error text per field, aria-required, aria-live.
- Effort: 3-4 hours.

6. Moderate — Heading Hierarchy (WCAG 1.3.1)

Heading structure skips levels: h1 jumps to h3, confusing screen reader navigation.

- Homepage: h1 then h3 with no h2.
- Pricing cards: parent section heading missing.
- Ensure sequential h1, h2, h3 hierarchy.
- Effort: 1-2 hours.

7. Remediation Roadmap

Prioritized action plan to achieve WCAG 2.1 AA compliance within 30 days.

- Re-audit after remediation to confirm all criteria pass.
- Estimated total effort: 22-32 hours across the full team.

Priority	Issue	WCAG	Effort	Deadline
P0 Week 1	Color contrast	1.4.3	2-4h	Day 7
P0 Week 1	ARIA labels	4.1.2	4-6h	Day 7
P0 Week 2	Keyboard nav	2.1.1	6-8h	Day 14
P1 Week 2	Image alt text	1.1.1	1-2h	Day 14
P1 Week 3	Form accessibility	3.3.2	3-4h	Day 21
P2 Week 3	Heading hierarchy	1.3.1	1-2h	Day 21
P2 Week 4	Final QA + retest	All	4-6h	Day 28
